

AMENDMENTS TO THE ABSTRACT

Please amend the abstract as follows:

A chlorinated azetidinone derivative expressed by Formula (1) and an alcoholate are allowed to react in a solvent containing at least one of alcohols and an ether at a pH of 8 or less.

Thus a 3-chloromethyl-3-cephem derivative expressed by ~~formula~~ Formula (2) is prepared.

In the formulas, R₁ represents a substituted or unsubstituted aryl group or a substituted or unsubstituted heterocyclic residue, and R₂ and R₃ each represent a substituted or unsubstituted aromatic hydrocarbon group.
